SKILLS AND CERTIFICATIONS

- HTML, CSS, JavaScript, C#, Python, Git, React.JS, Node.JS, Express.JS, SQL, Typescript
- Figma, Adobe Suite, Microsoft Suite, Foundational C# and Python 3 Code Academy Certification

EDUCATION

Indiana University, Indianapolis Indiana | *Bachelor of Science - Media Arts & Science*

- Graduate of the Luddy School of Informatics, Computing, and Engineering.
- Recipient of the Norman Brown Leadership Scholarship, a competitive four-year scholarship recognizing academic excellence, leadership, and community impact.
- Developed skills in web development, UX/UI design, and game systems by contributing to agile projects with an emphasis on clean code, responsive interfaces, and technical problem-solving.

TECHNICAL WORK PROJECTS

Threadway – Full Stack Web Development

May 2025

- Built a full-stack web application using PostgreSQL, Express, React, and Node.js, enabling users to create accounts and save internet links
- Implemented user authentication and session management with Passport.js and Supabase.
- **Result:** Gained hands-on experience with backend development, including Express routing, session and cookie management, Passport-based authentication, and relational data modeling in PostgreSQL.

Client Data Analyst Portfolio - Front-End Web Development

March 2025

- Designed and built a responsive portfolio website for a data analyst client using Tailwind CSS for rapid, customizable styling.
- Integrated SVG animations and dynamic text to create an interactive and modern UX.
- **Result:** Client successfully used the portfolio to apply for data roles and received positive feedback from hiring managers.

Breadbox - Full-Stack Web Development

January 2025

- Created a news aggregation site using Express.js, Node.js, and PostgreSQL, allowing users to browse categorized articles.
- Developed server-side logic to handle user requests and deliver dynamic content from a custom database.
- **Result:** Demonstrated full-stack fluency by building a functional, user-ready MVP from scratch, used as capstone for final semester review.

BRENDAN LEWIS

TECHNICAL WORK PROJECTS

Reddit Mini- Front-End Web Development

September 2024

- Built a Reddit browser app using React.js and Redux, enabling users to explore trending subreddits and posts.
- Pulled real-time data using the Reddit API, with features like post previews, subreddit filtering, and content loading states.
- **Result:** Used to practice and demonstrate API integration + state management; improved performance using memorization techniques.

Jammin - Front-End Web Development

July 2024

- Developed a music discovery and playlist web app using React.js and the Spotify API.
- Allowed users to search songs, preview tracks, and create/save custom playlists via OAuth authentication.
- **Result:** Successfully implemented third-party API and OAuth for the first time; shared among peers and used in demo portfolio.

Portfolio Website - Front-End Web Development

May 2024

- Engineered a responsive portfolio site from scratch with HTML, CSS, and JavaScript, applying modern web development practices to present projects and skills.
- Implemented responsive layout and modern UI/UX patterns to ensure accessibility across devices.
- **Result:** Increased LinkedIn profile views and helped recruiters better understand technical background.
